

## **Herz Fig No 7217 GV**

Variable orifice zone/control valve available in sizes DN15 - DN25, the valve body shall be constructed from DZR Copper alloy and be threaded to ISO 7-1 Rp, rated PN16. The combined balancing and control valve shall be fitted with self-sealing test points either side of the valve seat for flow verification. The valve seat will have a 4mm lift with 1 full turn to the spindle for presetting. An on/off or modulating actuator with a M28 x 1.5 mounting thread should be fitted to the valve to facilitate control. The valve should be able to be utilised as a partner valve in conjunction with a DPCV with the addition of a special test point adapter. The valve manufacturer shall provide a five year fully comprehensive warranty, covering parts, labour and consequential loss.
